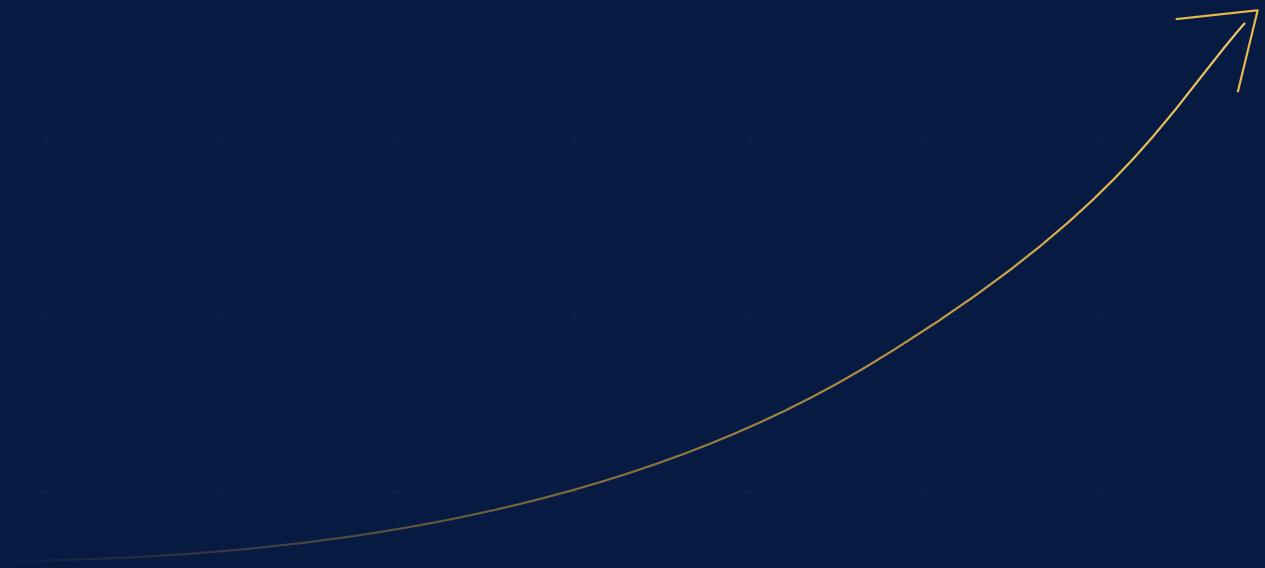
IMPACTS
Innovate • Empower • Transform



COMPANY PROFILE

Solomon Amanor Impacts

Creating Sustainable Impact for a Better Tomorrow.

WHO WE ARE

A diversified technology, business and innovation company.

Solomon Amanor Impacts is a diversified business and innovation company. Its foundation is technology — software engineering, mobile and web development, and cybersecurity — and from that foundation it is building interests across finance, commerce, logistics, education, real estate, agriculture and media.

The group is structured as one brand with distinct divisions, each held to the same standards of integrity and quality. Some divisions deliver work today; others are in development or represent long-term interests. We are open about which is which, because credibility is built on accuracy.

Our ambition is long-term: to build a respected group of businesses that create real value for clients, partners and the communities in which we operate.

VISION

To build a globally respected business group that creates sustainable value through innovation, entrepreneurship, technology and strategic investments.

MISSION

To develop meaningful solutions, build successful businesses, create opportunities and deliver lasting value to individuals, organizations and communities.

CORE VALUES

Integrity

We say what we mean, represent our work accurately and keep our commitments.

Innovation

We pursue better solutions with curiosity and disciplined experimentation.

Excellence

We hold our work to a high standard, in the details as much as the big picture.

Accountability

We take ownership of outcomes, including the ones that do not go to plan.

Creativity

We bring imagination to problems that do not have obvious answers.

Collaboration

We build with partners, clients and communities — not merely for them.

Sustainability

We favour decisions that create value over the long term.

Impact

We measure success by the difference our work makes.

LEADERSHIP

Solomon Amanor, Founder

Solomon Amanor is a software developer, mobile application developer and cybersecurity professional with an entrepreneur's interest in building businesses across multiple industries.

OUR DIVISIONS

Eight divisions, each with an honest status.

01 Technology & Cybersecurity
● ACTIVE

Software, mobile and web engineering paired with practical security expertise — from first prototype to protected production systems.

02 Finance & Investments
○ IN DEVELOPMENT

Financial technology, market-analysis tools and a long-term interest in disciplined, well-governed investment across asset classes.

03 Trade & Commerce
○ EXPLORING

Import, export, distribution and digital commerce — building the commercial relationships that move goods efficiently between markets.

04 Logistics & Infrastructure
○ EXPLORING

Technology for logistics and delivery, with long-term interests in transport, water distribution, energy and infrastructure.

05 Education & Consulting
● ACTIVE

Technology and business consulting alongside training in cybersecurity, software development, digital skills and entrepreneurship.

06 Real Estate & Construction
◌ FUTURE INTEREST

A long-term interest in property investment, development and management, construction and the infrastructure that supports communities.

07 Agriculture & Manufacturing
◌ FUTURE INTEREST

Future interests in commercial agriculture, agricultural technology, food processing and manufacturing that strengthen local value chains.

08 Media & Entertainment
○ EXPLORING

Digital media, content and brand building, with interests in music, talent and entertainment management.

● ACTIVE
Services offered and work delivered today.

○ IN DEVELOPMENT
Ventures and products currently being built.

○ EXPLORING
Opportunities under evaluation and early-stage work.

◌ FUTURE INTEREST
Long-term expansion and investment interests.

SERVICES

What we offer.

Software & Application Development

Web platforms, mobile applications and business software designed around real workflows and built to be maintained.

Cybersecurity & Digital Protection

Authorised security testing, audits and practical guidance that help organisations find and fix weaknesses before attackers do.

IT Consulting & Infrastructure

Independent advice on systems, cloud and infrastructure decisions — so technology investments are sound, secure and proportionate.

Business & Management Consulting

Structured thinking for founders and leaders — clarifying strategy, operations and the role technology should play in growth.

Digital Transformation

Modernising how organisations work — replacing manual processes with dependable digital systems people actually adopt.

Technology Training

Practical training in cybersecurity, software development and digital skills for individuals, institutions and corporate teams.

Business Development & Strategic Advisory

Helping ventures identify opportunities, structure partnerships and build the commercial foundations for sustainable growth.

Trade & Commercial Support

Support for sourcing, procurement and commercial partnerships, with digital tools that bring visibility to trade operations.
